H2O Online — Requirements Capture Document

Document type: Business Analysis & Functional Requirements

Product: H2O Online Platform

Version: 1.0

Purpose: Comprehensive feature and requirement reference for stakeholders, business analysts, and product owners

1. Executive Summary

H2O Online is a **multi-sided water delivery ecosystem** connecting households and businesses with verified water suppliers and delivery partners through a mobile application, supported by a central **admin operations portal**.

The platform enables customers to discover water products, place one-time or scheduled orders, subscribe to recurring delivery plans, track deliveries in real time, manage payments through an integrated wallet, log daily hydration, and receive AI-powered wellness insights. Suppliers manage catalogues, accept orders, assign riders, and view earnings. Delivery partners fulfil instant orders and subscription routes. Administrators verify partners, manage subscriptions, oversee finances, and handle support across all user types.

Strategic positioning: Beyond transactional water delivery — the product combines **convenience, subscription retention, wallet-based payments**, and **health engagement** (hydration tracking + AI) to build long-term customer relationships.

2. Business Objectives

ID	Objective	Success indicator
BO-01	Enable on-demand and scheduled water ordering for end customers	Customers complete order-to-delivery journey in-app
BO-02	Drive recurring revenue through subscription plans	Active subscriptions with paid monthly bills
BO-03	Onboard and verify water suppliers and delivery partners at scale	Verified partners transacting on platform
BO-04	Provide transparent platform economics for suppliers and delivery partners	Partners view earnings, commission, and wallet history
BO-05	Centralise operations through admin portal	Admin manages users, orders, subscriptions, support, finances
BO-06	Increase customer engagement beyond ordering	Hydration tracking and AI insights used regularly
BO-07	Build trust through verification and support	Document verification before partner go-live; ticket/chat support

3. Stakeholders & User Personas

3.1 Primary personas

Persona	Channel	Status	Primary need
Customer	Mobile app	Live	Order water, subscribe, track, pay, manage account
Supplier (Water vendor)	Mobile app	Live	Sell water, fulfil orders, manage products & earnings
Delivery partner	Mobile app	Live	Pick up and deliver orders; subscription routes
Master administrator	Admin web portal	Live	Full platform control
Administrator	Admin web portal	Live	Operations with same powers as master (except master account changes)

Persona	Channel	Status	Primary need
Sub-administrator	Admin web portal	Live	Day-to-day ops without financials, destructive actions, or admin creation

3.2 Future / demo personas

Persona	Channel	Status	Notes
Corporate buyer	Mobile app	Demo UI only	Bulk office supply, analytics, invoicing (sample data)
Restaurant	Mobile app	Coming soon	Hospitality water solutions
Event organisation	Mobile app	Coming soon	Large-volume event supply
Institute / College	Mobile app	Coming soon	Campus water monitoring and supply

3.3 Customer segments (platform vision)

Corporate, Organisation, Institute, College — reflected in wallet segmentation and future role expansion.

4. Scope

4.1 In scope (current release)

- Customer mobile journey: registration, ordering, subscriptions, billing, tracking, hydration, profile, support
- Supplier mobile journey: onboarding, verification, catalog, order acceptance, rider assignment, financials, wallet, support
- Delivery partner mobile journey: onboarding, verification, order fulfilment, subscription routes, earnings, support
- Admin portal: user management, orders, supplier/partner verification, plans & rates, subscription delivery assignment, wallet management, financials, support channels
- Cross-cutting: H2 Wallet, subscription billing, Water AI Sense, product reviews, privacy policy

4.2 Out of scope / partial (documented gaps)

- Live Corporate, Restaurant, Event, Institute commercial flows (Corporate exists as demo only)
- Full loyalty points earn/redeem programme (display only today)
- Coupon discount engine (UI present; rules not implemented)
- OTP login as production-grade authentication (mock flow)
- Live map tracking on order screen (placeholder)
- Connected wearables integration (presentation UI)
- Payment gateway integration for UPI/card (wallet is primary integrated path; other methods are customer-facing options)

5. Functional Requirements — Entry & Authentication

Req ID	Requirement	Priority
FR-AUTH-01	User shall select role on welcome screen: Customer, Partner, Corporate, Restaurant, Event Org, Institute	Must
FR-AUTH-02	Customer shall register with name, email, phone, password, age, gender, activity level, family size	Must
FR-AUTH-03	Customer shall upload profile photo and select starter plan during registration	Should
FR-AUTH-04	Customer shall set daily hydration goal during registration	Should
FR-AUTH-05	User shall accept terms and conditions before account activation or login	Must
FR-AUTH-06	User shall log in with email and password with role validation	Must
FR-AUTH-07	User shall recover password via registered email	Must
FR-AUTH-08	User shall optionally log in via OTP (one-time code)	Could
FR-AUTH-09	User shall log out securely from profile	Must
FR-AUTH-10	Supplier shall complete business registration: business name, contact, address, GST, bank details	Must

Req ID	Requirement	Priority
FR-AUTH-11	Supplier shall upload ID proof, business license, address proof	Must
FR-AUTH-12	Delivery partner shall register with vehicle type and identity documentation	Must
FR-AUTH-13	New supplier/partner shall receive verification pending status until admin approval	Must
FR-AUTH-14	Supplier shall receive 6-digit onboarding verification code after registration	Should

6. Functional Requirements — Customer App

6.1 Home dashboard

Req ID	Requirement	Priority
FR-CUS-01	Customer shall see personalised greeting with name and profile photo	Must
FR-CUS-02	Customer shall view H2 Wallet balance and reward points at a glance	Must
FR-CUS-03	Customer shall access quick actions: Order Jar, My Plan, Track, Wallet, Water Intake, Billing	Must
FR-CUS-04	Customer shall see banner for ongoing order with status and link to tracking	Must
FR-CUS-05	Customer shall view weekly hydration graph and today's goal progress	Must
FR-CUS-06	Customer shall view and manage active subscriptions from dashboard	Must
FR-CUS-07	Customer shall receive Water AI Sense hydration insights (expandable)	Should
FR-CUS-08	Customer shall open AI health report and Ask AI from dashboard	Should
FR-CUS-09	Customer shall view connected devices section (watch, smart bottle, TV hub)	Could

6.2 Browse, cart & checkout

Req ID	Requirement	Priority
FR-CUS-10	Customer shall browse water product catalogue (jars, bottles, dispensers, tankers, bulk)	Must
FR-CUS-11	Customer shall filter products by price, fastest delivery, top rated, nearest supplier	Must
FR-CUS-12	Customer shall filter by size range (1–5 L through 20+ L), bulk, tanker	Must
FR-CUS-13	Customer shall filter by use case: party/function, office	Should
FR-CUS-14	Customer shall view product ratings and customer reviews	Must
FR-CUS-15	Customer shall compare products side by side	Should
FR-CUS-16	Customer shall add products to cart or buy instantly	Must
FR-CUS-17	Customer shall manage cart quantities, remove items, view subtotal	Must
FR-CUS-18	Customer shall enter or select delivery address at checkout	Must
FR-CUS-19	Customer shall choose instant delivery or schedule date/time (within 7 days)	Must
FR-CUS-20	Customer shall order for someone else with receiver name and phone	Should
FR-CUS-21	Customer shall apply coupon code at checkout	Could
FR-CUS-22	Customer shall access wallet top-up from checkout	Should

6.3 Payment & order fulfilment visibility

Req ID	Requirement	Priority
FR-CUS-23	Customer shall pay via H2 Wallet, UPI, card, or cash on delivery	Must
FR-CUS-24	Customer shall receive order confirmation with order ID	Must
FR-CUS-25	Customer shall track order through status timeline: accepted → picked up → out for delivery → delivered	Must
FR-CUS-26	Customer shall view ETA, supplier info, delivery partner info, and call driver	Must

Req ID	Requirement	Priority
FR-CUS-27	Customer shall view order history with status filters	Must
FR-CUS-28	Customer shall rate and review delivered products	Must
FR-CUS-29	Customer shall reorder or shop again from order history	Should

6.4 Addresses & account

Req ID	Requirement	Priority
FR-CUS-30	Customer shall save multiple delivery addresses (home, office, etc.)	Must
FR-CUS-31	Customer shall add, edit, delete addresses with full address and PIN	Must
FR-CUS-32	Customer shall set default delivery address	Must
FR-CUS-33	Customer shall edit personal information (name, email, phone)	Must
FR-CUS-34	Customer shall manage payment methods (cards, UPI, wallet)	Should
FR-CUS-35	Customer shall change password	Must
FR-CUS-36	Customer shall view order count, loyalty points, wallet in profile	Must

6.5 Subscriptions & billing

Req ID	Requirement	Priority
FR-CUS-37	Customer shall choose subscription plan: Basic, Family, Active, Premium	Must
FR-CUS-38	Customer shall set frequency: daily, weekly, monthly with date selection	Must
FR-CUS-39	Customer shall set preferred delivery time window	Must
FR-CUS-40	Customer shall select product and quantity within plan	Must
FR-CUS-41	Customer shall assign delivery address to subscription	Must
FR-CUS-42	Customer shall create and cancel subscriptions	Must
FR-CUS-43	Customer shall view monthly subscription bills (pending, paid, overdue)	Must
FR-CUS-44	Customer shall pay subscription bills from H2 Wallet	Must

6.6 Hydration & wellness

Req ID	Requirement	Priority
FR-CUS-45	Customer shall log water intake by glass, jar, bottle, or custom volume	Must
FR-CUS-46	Customer shall track progress toward daily hydration goal	Must
FR-CUS-47	Customer shall view 7-day consumption graph	Must
FR-CUS-48	Customer shall receive suggested intake based on profile and activity	Should
FR-CUS-49	AI insights shall include non-medical disclaimer	Must

6.7 Support & compliance

Req ID	Requirement	Priority
FR-CUS-50	Customer shall create support ticket with category, subject, description	Must
FR-CUS-51	Customer shall view ticket status: Open, In Progress, Resolved, Closed	Must
FR-CUS-52	Customer shall reply on ticket thread	Must
FR-CUS-53	Customer shall read in-app privacy policy	Must

7. Functional Requirements — Supplier App

Req ID	Requirement	Priority
FR-SUP-01	Supplier shall view dashboard with today's earnings and delivery count	Must
FR-SUP-02	Supplier shall receive alert for pending incoming orders	Must
FR-SUP-03	Supplier shall view incoming orders filtered by instant/scheduled	Must
FR-SUP-04	Supplier shall accept order with ETA, remarks, fleet type	Must
FR-SUP-05	Supplier shall reject or cancel orders	Must
FR-SUP-06	Supplier shall assign or change delivery partner on accepted orders	Must
FR-SUP-07	Supplier shall view order history (delivered, in progress, cancelled)	Must
FR-SUP-08	Supplier shall manage product catalogue: add, edit price/stock/delivery time, remove	Must
FR-SUP-09	Supplier shall view financials: gross revenue, platform fee, net earnings	Must
FR-SUP-10	Supplier shall view wallet balance and transaction history	Must
FR-SUP-11	Supplier shall chat with admin support team	Must
FR-SUP-12	Supplier shall not access dashboard until admin verifies documents	Must

8. Functional Requirements — Delivery Partner App

Req ID	Requirement	Priority
FR-DEL-01	Delivery partner shall view dashboard with incoming and subscription badges	Must
FR-DEL-02	Partner shall view assigned instant and scheduled orders	Must
FR-DEL-03	Partner shall mark order as picked up	Must
FR-DEL-04	Partner shall mark order as delivered	Must
FR-DEL-05	Partner shall view subscription delivery routes assigned by admin	Must
FR-DEL-06	Partner shall filter subscription orders by today, this week, time range	Should
FR-DEL-07	Partner shall view completed delivery history with earnings	Must
FR-DEL-08	Partner shall view summary stats: total, delivered, in progress, cancelled	Must
FR-DEL-09	Partner shall view earnings breakdown and wallet balance	Must
FR-DEL-10	Partner shall redeem earnings from wallet	Must
FR-DEL-11	Partner shall update profile: name, phone, vehicle, photo	Must
FR-DEL-12	Partner shall chat with admin for route/delivery issues	Must
FR-DEL-13	Partner shall not operate until admin verifies documents	Must

9. Functional Requirements — Admin Portal

9.1 User & order management

Req ID	Requirement	Priority
FR-ADM-01	Admin shall search, filter, sort, and paginate users	Must
FR-ADM-02	Admin shall view and edit user profile fields	Must
FR-ADM-03	Admin/Master shall delete users; Sub-admin shall not	Must
FR-ADM-04	Admin shall view all orders with status filters	Must
FR-ADM-05	Admin shall view order detail: customer, items, total, timeline	Must

9.2 Partner verification

Req ID	Requirement	Priority
FR-ADM-06	Admin shall review supplier verification queue (ID, address, license)	Must
FR-ADM-07	Admin shall approve or reject supplier verification	Must
FR-ADM-08	Admin shall add supplier manually with business and bank details	Must
FR-ADM-09	Admin shall set per-supplier commission percentage	Must
FR-ADM-10	Admin/Master shall remove supplier; Sub-admin shall not	Must
FR-ADM-11	Admin shall review and approve/reject delivery partner documents	Must

9.3 Plans, subscriptions & delivery routing

Req ID	Requirement	Priority
FR-ADM-12	Admin shall manage plan tiers and plan product rates (daily/weekly/monthly)	Must
FR-ADM-13	Admin shall add, edit, remove plan products	Must
FR-ADM-14	Admin shall view subscription book with search and status filters	Must
FR-ADM-15	Admin shall pause (deactivate) or manage subscription status	Must
FR-ADM-16	Admin shall assign delivery partner and pickup hub per subscription	Must
FR-ADM-17	Admin shall bulk-assign subscriptions by locality/PIN to one partner	Should
FR-ADM-18	Admin shall edit subscription locality, PIN, preferred delivery time	Must
FR-ADM-19	Admin shall view subscription financial summary	Must

9.4 Wallet & financials

Req ID	Requirement	Priority
FR-ADM-20	Admin shall view wallets by segment: Customer, Supplier, Delivery, Corporate, etc.	Must
FR-ADM-21	Admin shall adjust wallet balance (add, deduct, set) with notes	Must
FR-ADM-22	Admin/Master shall view platform financials: revenue, commission, payouts, profit	Must
FR-ADM-23	Sub-admin shall not access financials	Must

9.5 Admin users & support

Req ID	Requirement	Priority
FR-ADM-24	Admin/Master shall create Admin or Sub-admin accounts	Must
FR-ADM-25	Admin shall manage customer support tickets: reply, update status	Must
FR-ADM-26	Admin shall respond to supplier support chat threads	Must
FR-ADM-27	Admin shall respond to delivery partner support chat threads	Must

9.6 Admin role matrix

Capability	Master	Admin	Sub-admin
View/edit users	Yes	Yes	Yes (no delete)
Delete users	Yes	Yes	No
Manage orders	Yes	Yes	Yes
Add suppliers	Yes	Yes	Yes
Remove suppliers	Yes	Yes	No
Verify partners	Yes	Yes	Yes
Plans & rates	Yes	Yes	Yes

Capability	Master	Admin	Sub-admin
Subscription routing	Yes	Yes	Yes
Wallet management	Yes	Yes	Yes
Financials	Yes	Yes	No
Create admin users	Yes	Yes	No
All support channels	Yes	Yes	Yes

10. Functional Requirements — Corporate Demo

Req ID	Requirement	Priority
FR-COR-01	User shall complete multi-step corporate company registration (demo)	Could
FR-COR-02	User shall enter access code CORP2024 to enter Corporate Hub	Could
FR-COR-03	Corporate Hub shall show company metrics, consumption graphs, bulk schedules	Could
FR-COR-04	Corporate Hub shall show invoice list and order history (sample data)	Could

Note: Corporate is not a live commercial offering; requirements marked Could for future productisation.

11. Cross-Cutting Business Capabilities

11.1 H2 Wallet

- Customers top up wallet and pay for orders and subscription bills
- Suppliers receive order payouts minus platform commission
- Delivery partners receive earnings and redeem to external payout
- Admin oversees all wallet segments and performs manual adjustments
- Platform wallet tracks aggregate transaction flow for financial reporting

11.2 Platform economics

- Configurable supplier commission (default ~20% platform fee)
- Supplier financials show gross revenue, platform deduction, net earnings
- Admin financials show total revenue, platform cut, partner obligations, net profit

11.3 Water AI Sense

- Daily personalised hydration insight on dashboard and intake tracker
- AI-generated health/hydration report with recommendations
- Natural-language Ask AI for hydration, ordering, and subscription guidance
- Context uses profile, intake logs, and app activity; includes medical disclaimer

11.4 Support model

User type	Format	Categories / topics
Customer	Tickets with status lifecycle	Order, Delivery, Payment, Account, Product quality, Other
Supplier	Persistent chat with admin	Business, orders, verification, payouts
Delivery partner	Persistent chat with admin	Routes, assignments, earnings

11.5 Reviews & trust

- Customers rate and review products after delivery
- Product catalogue displays aggregate ratings and review counts
- Suppliers and delivery partners verified before platform access

12. Business Workflows

Workflow A — Customer one-time order

1. Customer browses catalogue → adds to cart
2. Checkout: address, instant or scheduled delivery, optional receiver details
3. Payment via wallet, UPI, card, or COD
4. Order confirmed; customer tracks live status
5. Supplier accepts, sets ETA, assigns delivery partner
6. Partner picks up → delivers
7. Customer rates product in order history

Workflow B — Subscription lifecycle

1. Customer selects plan, product, frequency, dates, time window, address
2. Platform creates subscription and generates monthly bills
3. Admin assigns delivery partner and pickup hub (optional bulk by locality)
4. Delivery partner fulfils via subscription orders screen
5. Customer pays bills from wallet via Subscription Billing
6. Customer or admin may cancel/pause subscription

Workflow C — Supplier onboarding

1. Partner registers with business details and documents
2. Receives verification code; status = pending
3. Admin reviews and approves/rejects in verification queue
4. Approved supplier accesses dashboard, manages catalog, accepts orders

Workflow D — Delivery partner fulfilment

1. Partner registers with vehicle and documents → pending verification
2. Admin approves → partner receives assignments from supplier or admin
3. Partner updates picked up → delivered
4. Earnings credited to wallet; partner redeems via financials

Workflow E — Customer support

1. Customer creates ticket with category and description
2. Admin responds and updates status (Open → In Progress → Resolved → Closed)
3. Customer views thread and adds replies

Workflow F — Admin daily operations

1. Process supplier and delivery verification queues
2. Monitor orders and subscription delivery capacity
3. Adjust plans/rates and wallets as needed
4. Handle customer tickets and partner support chats
5. Review financials (restricted roles)

13. Business Rules

Rule ID	Rule
BR-01	Supplier and delivery partner cannot transact until admin document verification is complete
BR-02	Customer must accept terms before registration or login
BR-03	Login must match selected role (Customer, Supplier, Delivery partner)

Rule ID	Rule
BR-04	Subscription bills transition: Pending → Paid (via wallet) or Overdue
BR-05	Platform commission deducted from supplier earnings before wallet credit
BR-06	Admin role determines access to financials, user deletion, supplier removal, admin creation
BR-07	Order cancellation limited to in-progress orders
BR-08	AI outputs must display non-medical advice disclaimer
BR-09	Privacy policy must be accessible from customer profile
BR-10	Scheduled delivery date must be within 7 days of checkout

14. Non-Functional Business Requirements

Req ID	Category	Requirement
NFR-01	Trust	Verification SLA communicated to partners (e.g. 24–48 hours)
NFR-02	Security	Role-based access enforced on mobile and admin
NFR-03	Privacy	Privacy policy defines data collection, sharing with suppliers for fulfilment, and user rights
NFR-04	Payments	Card details not stored on platform (stated in privacy policy)
NFR-05	Operations	Real-time order status updates visible to customer tracking
NFR-06	Scalability	Admin bulk subscription assignment supports geographic routing
NFR-07	Engagement	Hydration and AI features support retention beyond pure delivery
NFR-08	Support	Ticket and chat channels refresh for timely admin response
NFR-09	Transparency	Suppliers see platform fee vs net earnings clearly
NFR-10	Compliance	Children's privacy addressed in privacy policy

15. Assumptions & Constraints

Assumptions

- Customers have smartphone with internet for mobile app usage
- Suppliers and delivery partners provide valid identity and business documents
- Admin team available to process verification and support queues
- MongoDB-backed data store available for all transactional data
- Groq API available for AI features (optional for core ordering)

Constraints

- Corporate, Restaurant, Event, Institute roles not commercially live
- HTTP cleartext allowed on mobile for current deployment model
- Master admin uses fixed credentials (not database-managed)
- Wallet is primary integrated payment path; UPI/card/COD are customer-facing options

16. Future Scope & Product Backlog

Item	Description	Priority
BL-01	Live Corporate B2B ordering and invoicing	High
BL-02	Restaurant, Event, Institute role launch	Medium
BL-03	Loyalty points earn and redeem programme	Medium

Item	Description	Priority
BL-04	Coupon and promotion engine	Medium
BL-05	Production OTP/SMS authentication	High
BL-06	Live map tracking on order screen	Medium
BL-07	Wearable and smart bottle integrations	Low
BL-08	Payment gateway for UPI and cards	High
BL-09	Push notifications for order and delivery updates	High
BL-10	Multi-language support	Low

17. Glossary

Term	Definition
H2 Wallet	In-app digital wallet for customers, suppliers, and delivery partners
Water AI Sense	AI-powered hydration insights, reports, and Q&A
Subscription plan	Recurring water delivery package (Basic, Family, Active, Premium)
Platform commission	Percentage retained by H2O Online from supplier order revenue
Pickup hub	Admin-defined location for delivery partner order collection
Instant order	One-time order for immediate or near-term delivery
Scheduled order	One-time order for a future date and time
Verification queue	Admin list of pending supplier/partner document approvals
Master admin	Fixed super-user with full portal access

18. Document Sign-Off

Role	Name	Date	Signature
Product Owner			
Business Analyst			
Project Sponsor			
Technical Lead			

This document captures functional and business requirements derived from the H2O Online product as implemented across the customer mobile app, supplier app, delivery partner app, and admin portal.
